Education

Florida Institute of Technology | *B.S. in Computer Science* | GPA: 3.29

Expected Summer 2026

- **Awards:** NCL Spring 2026: Team Game – Diamond-1, 98th percentile, 12th/341 teams; Individual Game – Diamond-1, 96th percentile, 176th/7,010 competitors; Dean's List 6x; Florida Medallion Scholarship.
- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Computer Networks, Software Testing, Software Design Methods, Programming Language Concepts, Formal Languages and Automata Theory, Computer Architecture and Assembly.

Technical Skills

Languages: Java, Python, C#, x86 Assembly, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks/Libraries: React, Next.js, Node.js, Express, Flask, Leaflet, Tailwind CSS

Tools/Platforms: Git, GitHub, VS Code, Unity, Docker, Vercel, Vite, Linux, Unix, Windows

Databases/APIs: MongoDB, REST APIs, Kitsu API, API Integration

Projects

FIT AR Navigation App (*Senior Project*) | jacobhallburns.github.io/FITARNA/

Apr. 2026

- Developed a mobile AR navigation app for indoor campus navigation using Unity, Vuforia, and C#.
- Implemented real-time route visualization with Unity NavMesh, device tracking, AR tours, and informational pop-ups across multiple floors.
- Produced technical documentation covering requirements, system architecture, test plans, and core development decisions.

MyMangaReader (*Full-Stack Web App*) | my-manga-reader-pi.vercel.app/

Mar. 2026

- Built a full-stack manga tracking platform with a Next.js frontend, Node.js/Express backend, MongoDB database, and Dockerized development setup.
- Integrated the Kitsu API to support manga search, ratings, reading status tracking, and personalized user libraries.
- Implemented responsive UI components and backend endpoints for managing user manga collections.

HeatShield (*Hackathon Prototype*) | github.com/stamparkour/Groundswell-Startup-Hackathon-2026

Apr. 2026

- Built a Dockerized full-stack hackathon prototype for remote health telemetry monitoring and field-team tracking using React, Vite, Flask, and Leaflet.
- Created operator and supervisor dashboards for real-time telemetry monitoring, alerts, and map-based tracking with multi-session demos.

Assembly Casino Game | github.com/Dvizee/Assembly-Casino-Game

Apr. 2025

- Developed an x86 Assembly casino simulator using the Irvine32 library, featuring Slot Machine and Roulette gameplay.
- Implemented game state transitions, balance tracking, input validation, ASCII rendering, animation, scoring, and payout logic.

Portfolio Website | vincenzo-portfolio.vercel.app/

May 2026

- Designed and developed a responsive personal portfolio website using Next.js, TypeScript, Tailwind CSS, and Vercel.
- Built reusable UI components, responsive layouts, animations, and project showcase sections for a deployed portfolio site.

Rhythm Runner (*Unity Game*) | tyler-win.itch.io/rhythm-runner

Nov. 2025

- Co-developed a 2D rhythm game in Unity, contributing gameplay scripting, level design, animations, and asset integration.

Experience

E-Commerce Assistant | *Florida Institute of Technology, Melbourne, FL*

Sept. 2025 – Dec. 2025

- Helped manage the university's web-to-print portal by troubleshooting site issues, updating HTML/CSS-based content, and configuring online products.
- Improved portal usability by updating product listings, editing page content, and supporting routine website maintenance.
- Wrote concise SOPs that enabled staff to complete routine portal edits and product updates more independently.

Leadership & Activities

Computer Science Networking Society | *Outreach & Collaboration Liaison*

Spring 2026

- Coordinated partnerships with campus organizations, managed outreach to prospective members, and contributed to promotional design materials.

FITSEC | *Active Member*

Spring 2026

- Participated in cybersecurity challenges, club activities, and the Spring 2026 National Cyber League competition.

Game Development Club | *Active Member*

Spring 2024 – Spring 2026

- Contributed to development of a PC top-down roguelike game using Godot.
